Tom Ciciora—Director

WEBSITE SECURITY NOTES

The City of Sandwich website does not use or place cookies in your browser. We value your privacy, so we leave your computer and phone alone.

That “Not Secure” message in your browser’s address bar? It’s kind of misleading. That message signifies that the webpage does not have a valid security certificate. In the case of the City website, it’s of no consequence. We host no financial transactions, collect no personal data, and don’t track you. The EPay Electronic Bill Payment is handled on another website hosted by the State of Illinois, which does have a security certificate.

All documents hosted on the City website are uploaded to the web server free of viruses, spyware and other malicious code. That said, you should protect your own devices with appropriate security software.
